

# Boost Efficiency and Simplicity

## With Zebra's E-Citation Solutions for Law Enforcement

If your police department still relies on handwritten tickets for traffic and parking violations, you're missing out on significant time savings. Leverage Zebra's versatile e-citation technologies to reduce paperwork and errors and uncover hidden efficiencies in your workflows.

### Why Switch to E-Citations?

Speed up administrative processes and reduce officer burdens.

**Enhance officer safety:** Reduce distractions and time spent outside the patrol car to allow officers to focus more on their surroundings and potential threats.

**Increase efficiency:** Automate processes to issue citations faster and more accurately, increasing officer productivity and reducing errors that can invalidate tickets.

**Lower processing costs:** Eliminate the need for manual data entry, postage and processing handwritten tickets to save time and money on administrative tasks.

### How Zebra's E-Citation Solutions Work

Our rugged mobile solutions are easy to use and integrate with your existing systems.

1. The officer scans the driver's license barcode with their tablet or mobile computer, enters the information manually or captures the vehicle's license plate information.
2. The device securely connects to your database and retrieves the driver's record and vehicle information.
3. The officer selects the appropriate violation code or enters it manually.
4. The device calculates the fine and sends a print job to generate the citation on a connected mobile printer.
5. The officer delivers the printed citation to the driver with instructions on how to pay or contest it or attaches the parking violation to the vehicle.
6. The device sends the citation data securely to your database for faster processing and collection without paperwork.

## Add Mobility to Your Citation Process

With Rugged, Purpose-Built Devices from Zebra

### ET8x Rugged 2-in-1 Tablet

Your officers need versatility in the field. Empower their productivity with Windows tablets that are equipped with a 12-inch display for easy reading in any lighting condition, an integrated barcode scanner to capture license information and a detachable keyboard for fast data entry. With ample connectivity options, your officers can issue citations, write reports and submit information remotely. And with accessories like shoulder and hand straps, patrol car mounts and docking stations, your officers can comfortably work wherever duty takes them.

### Zebra TC7X Touch Computer

Put power and communication in your officers' palms with the TC7X—the rugged handheld computer with the functionality of a smartphone and scanner combined. The TC7X features a glove-friendly, scratch-resistant 5-inch touchscreen so your officers can use it confidently in any environment. Its high-resolution camera can capture images and documents in the field while the powerful processor runs multiple applications simultaneously.

### Zebra ZQ500 Series Mobile Printer

Complement your tablets and mobile computers with powerful, portable printers. Built for the toughest environments, the exceptionally rugged ZQ500 Series prints high-quality citations, tickets and receipts up to 4 inches wide. It's designed for easy media loading, has a large intuitive display and a smart battery with analytics to power through the longest shifts.
